Hi Calvin, do you have any of the slideshows that CES did (maybe the one they did for us and the CA agencies)? If so, could you please send to me and I will get back to Anhar. She actually used to be in OGWDW several years back and knows the UIC program well. Also, I will take her up on the offer to set up something with Air Products – apparently a company that is interested in a Class VI project in CA.

Thanks,  
David

Hi Dave –

I hope you and yours are staying safe and doing well in this difficult time.

As I mentioned to Molly, if you can share any publicly available info about the Clean Energy Systems CCS project we would appreciate it. Even high level info on the project would be great.

Also, I'd be happy to help organize a webinar with Air Products if you are interested. They have a really interesting hydrogen project they are working on. Just let me know.

Feel free to call me with any questions at 240-449-0457.

Best regards,  
Anhar

Hi Anhar,

I'll refer you to David Albright (copied on this email) in Region 9 for questions about the CES project and setting up a discussion with Air Products. Thanks for reaching out.

Molly

Hi Bruce and Molly,  
You guys have mentioned a permit application in R9 and I'm wondering if you could share more info about the project. We heard that it is a Clean Energy Systems project and DOE has funded them in the past, but this isn't one of our projects so anything you could share would be appreciated.

I also want to give you a heads up that there is another project happening in R9 (not a DOE funded project). We got an update from Air Products about it on Friday and I don't think they've reached out to EPA yet. I'd like to suggest to Air Products that they brief you and R9, at your convenience, but wanted to touch base first to make sure that would be helpful?

Thanks,  
Anhar
